#### E. Capital Management

- E.1 Own funds
- E.2 Solvency Capital Requirement and Minimum Capital Requirement
- E.3 Use of Duration based equity risk sub-module in the calculation of SCR
- E.4 Difference between Standard Formula and any Internal Model used
- E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement
- E.6 Other information

#### Appendix:

- 1 Governance Map
- 2 SMUAE Quantitative Reporting Templates

## Introduction

The structure of the Solvency and Financial Condition Report ("SFCR") follows the public disclosure requirements of Articles 290 to 303 of the Commission Delegated Regulation (EU) 2015/35 (Solvency II regulations).

This is the SFCR for Steamship Mutual Underwriting Association (Europe) Limited ("SMUAE" or the "Club") for the year ending 20 February 2023.

This report sets out different aspects of the Club's solvency and financial condition, specifically its business and performance, system of governance, risk profile, valuation methods used for solvency purposes and its capital management practices. The Club's financial year runs to 20 February each year and it reports its results in US dollars.

#### **Definitions**

Steamship A collective term covering Steamship Mutual Underwriting Association Limited ("SMUA"),

Steamship Mutual Underwriting Association (Europe) Limited ("SMUAE"), The Steamship Mutual Underwriting Association (Bermuda) Limited ("SMUAB") and The Steamship Mutual Trust ("Trust") and its Corporate Trustee, The Steamship Mutual Underwriting Association Trustees (Bermuda) Limited ("SMUAT") subject to regulatory capital requirements,

individually and collectively to the extent applicable in regulations.

**Regulators** The Prudential Regulation Authority ("PRA"), the Financial Conduct Authority ("FCA"),

Insurance Companies Control Service ("ICCS"), the Bermuda Monetary Authority ("BMA")

and the European Insurance & Occupational Pensions Authority ("EIOPA").

SMUA has branches regulated by the Monetary Authority of Singapore ("MAS"), the Japanese Financial Services Agency ("FSA") and Hong Kong Insurance Authority ("HKIA").

#### Regulatory terminology

General Term	ВМА	PRA / ICCS / EIOPA
Public disclosure document	(FCR) Financial Condition Report	(SFCR) Solvency & Financial Condition Report
Regulatory Group Level [Risk: Solvency Assessment]	(GSSA) Group Solvency Self-Assessment	( <b>Group ORSA</b> ) Group Own Risk and Solvency Assessment
Solo entity level [Risk: Solvency Assessment]	(CISSA) Commercial Insurers' Solvency Self-Assessment	(ORSA) Own Risk and Solvency Assessment
Standard formula capital requirement	( <b>BSCR</b> ) Bermuda Solvency Capital Requirement	(SCR) Solvency Capital Requirement
Minimum capital requirement	(MSM) Minimum Solvency Margin	(MCR) Minimum Capital Requirement
Capital resources	Available Statutory Capital & Surplus	Own Funds

## **Executive Summary**

Steamship manages its overall capital resources to maintain a financial strength rating of A from Standard & Poor's. This is a higher capital requirement than set by regulators.

The aim of this report is to enable readers to understand the amount and type of risks taken by an insurer, as reflected in its capital requirement, and to compare this with the amount and type of capital resources which the insurer has available to protect itself against those risks.

Under Solvency II Steamship is considered to be a regulatory group comprising SMUA, SMUAE, SMUAB, the Trust, and SMUAT. The supervisor for this group is the BMA and so Steamship calculates its group SCR using the BMA's standard formula.

The following tables show the components of the SCR and own funds of SMUAE:

\$000	2023	2022
Underwriting risk	22,383	18,102
Counterparty default risk	10,676	10,958
Market risk	1,324	808
Operational risk	4,867	5,575
	39,250	35,443
Diversification between risk categories	(4,759)	(4,207)
SCR	34,491	31,236

Consistent with the risk appetite of the Club the majority of the capital requirement derives from underwriting risk. Market risk primarily relates to the investments held by the Club and reflects the emphasis on capital preservation rather than investment return.

#### Own funds

\$000	2023	2022
Time 4 and the Land and the control of the control	20.400	04.005
Tier 1 capital - Free reserves on Solvency II basis  Tier 2 capital	39,406	24,905
Allowance for ability to make additional calls	17,246	15,618
		_
Total eligible own funds	56,652	40,523
SCR Ratio	164%	130%

Tier 1 capital refers to resources on the Solvency II balance sheet and is available to meet risks throughout the business.

Tier 2 capital relates to resources which are either only available to meet particular risks or are additional funds that can be raised if required. Tier 2 capital can be used to make up a maximum of 50% of the solvency capital requirement.

## **Executive Summary**

Solvency II requires that free reserves in the financial statements of \$40.3m be restated on an 'economic' basis. The main adjustments required are to the provision for outstanding claims where any prudence in provisions is removed, leaving a 'best or most likely estimate' of cost, a discount is then applied to reflect the time value of money and finally a 'risk margin' is added using a standard calculation. The aim of this adjustment is to make claim provisions and therefore free reserves more comparable across insurers.

The regulators recognise that the Club can increase own funds (capital resources) by making additional premium calls under its Rules and in accordance with the approved formula with an allowance of \$26.4m for the year ended 20 Feb 2023, capped at 50% of the SCR is included as Tier 2 capital.

Steamship also ensures that capital resources of individual Steamship companies are sufficient to meet the requirements set by local regulators.

#### **Outlook for 2023**

The Ukrainian crisis has had minimal impact on the Club's underwriting, claims, investments and operations, and all sanctions are being adhered to as required.

The very positive renewal with an achieved premium increase of 6.4% (including the value of changes to terms and conditions) against a general increase of 7.5% on expiring premium renewing provides confidence in achieving underwriting balance in policy year 2023/24.

## Statement of Directors' Responsibilities

#### Statement of Directors' Responsibilities

The Directors are responsible for preparing the SFCR in accordance with the Orders of the Superintendent of insurance (Supervisor) and Solvency II Regulations.

The Board is satisfied that, to the best of their knowledge:

- (a) throughout the financial year to 20 February 2023, the Club has complied in all material respects with the requirements of the ICCS rules and applicable Solvency II regulations; and
- (b) it is reasonable to believe that, at the date of the publication of the SFCR, the Club continue so to comply, and will continue so to comply in future.

The SFCR has been authorised for issue by the Directors on 21 May 2023.

By Order of the Board

R W Harris Director

#### **Independent Auditor's Report**

To: The Board of Directors of Steamship Mutual Underwriting Association (Europe) Limited

Report on the Audit of the relevant elements of the Solvency and Financial Condition Report

#### **Opinion**

We have audited the following Solvency II Quantitative Reporting Templates ("QRTs") contained in Annex I to Commission Implementing Regulation (EU) No 2015/2452 of 2 December 2015, of Steamship Mutual Underwriting Association (Europe) Limited (the "Association"), prepared as at 20 February 2023:

- S.02.01.02 Balance sheet
- S.17.01.02 Non-Life Technical Provisions
- S.23.01.01 Own funds
- S.25.01.21 Solvency Capital Requirement for undertakings on Standard Formula
- S.28.01.01 Minimum Capital Requirement Only life or only non-life insurance or reinsurance activity

The above QRTs are collectively referred to for the remainder of this report as "the relevant QRTs of the Solvency and Financial Condition Report".

In our opinion, the information in the relevant QRTs of the Solvency and Financial Condition Report as at 20 February 2023 is prepared, in all material respects, in accordance with the Insurance and Reinsurance Services and other Related Issues Law of 2016, the Commission Delegated Regulation (EU) 2015/35, the Commission Delegated Regulation (EU) 2016/467, the relevant EU Commission's Implementing Regulations and the relevant Orders of the Superintendent of Insurance (collectively "the Framework").

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the relevant QRTs of the Solvency and Financial Condition Report section of our report. We are independent of the Association in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the relevant QRTs of the Solvency and Financial Condition Report in Cyprus, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Emphasis of Matter**

We draw attention to the 'Valuation for solvency purposes' and 'Capital Management' sections of the Solvency and Financial Condition Report, which describe the basis of preparation. The Solvency and Financial Condition Report is prepared in compliance with the Framework, and therefore in accordance with a special purpose financial reporting framework. As a result, the Solvency and Financial Condition Report may not be suitable for another purpose. Our opinion is not modified in respect of this matter.

#### Other information

The Board of Directors is responsible for the Other information. The Other information comprises certain narrative sections and certain QRTs of the Solvency and Financial Condition Report as listed below:

#### Narrative sections:

- Business and performance
- Valuation for solvency purposes
- Capital management

QRTs (contained in Annex I to Commission Implementing Regulation (EU) No 2015/2452 of 2 December 2015):

- S.05.01.02 Premiums, claims and expenses by line of business
- S.05.02.01 Premiums, claims and expenses by country
- S.19.01.21 non-Life insurance claims Information

Our opinion on the relevant QRTs of the Solvency and Financial Condition Report does not cover the Other information listed above and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Solvency and Financial Condition Report, our responsibility is to read the Other information and, in doing so, consider whether the Other information is materially inconsistent with the relevant elements of the Solvency and Financial Condition Report, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this Other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the Board of Directors for the Solvency and Financial Condition Report

The Board of Directors is responsible for the preparation of the Solvency and Financial Condition Report in accordance with the Framework.

The Board of Directors is also responsible for such internal control as the Board of Directors determines is necessary to enable the preparation of a Solvency and Financial Condition Report that is free from material misstatement, whether due to fraud or error.

In preparing the Solvency and Financial Condition Report, the Board of Directors is responsible for assessing the Association's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Association or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Association's financial reporting process.

# Auditor's Responsibilities for the Audit of the relevant QRTs of the Solvency and Financial Condition Report

Our objectives are to obtain reasonable assurance about whether the relevant QRTs of the Solvency and Financial Condition Report are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Solvency and Financial Condition Report.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the relevant QRTs of the Solvency and Financial Condition Report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
  procedures that are appropriate in the circumstances, but not for the purpose of
  expressing an opinion on the effectiveness of the Association's internal control.
- Evaluate the appropriateness of the basis of preparation used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Association's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Solvency and Financial Condition Report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Association to cease to continue as a going concern.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

#### Other Matter

Our report is intended solely for the Board of Directors of the Association and should not be used by any other parties. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whose knowledge this report may come to.

21 May 2023

#### A.1 Business

Steamship is a mutual Protection and Indemnity insurer, otherwise known as a P&I Club, providing cover for its shipowner and charterer Members against third party liabilities arising from the use and operation of ships.

The Club covers a wide range of liabilities, including loss of life and personal injury to crew, passengers and others on board, cargo loss and damage, pollution by oil and other hazardous substances, wreck removal, collision and damage to property. The Club also provides a wide range of services to its Members (policyholders) on claims handling, legal issues and loss prevention, and plays a leading role in coordinating the response to, and management of, maritime casualties involving Members' vessels.

Steamship is one of the largest and most diverse P&I Clubs in the world, and is a member of the International Group of P&I Clubs participating in the International Group Pool.

The twelve principal underwriting associations which comprise the International Group collectively provide liability cover for shipowners who own approximately 90% of the world's ocean-going ships.

The International Group clubs provide cost-effective insurance to shipowners through a claims-sharing 'Pool' and collective purchase of the International Group excess loss reinsurance programme. These two arrangements provide a mechanism for sharing claims in excess of \$ 10m up to, currently, approximately \$ 9 billion. The policy year of all P&I Clubs commences at noon Greenwich Mean Time on 20<sup>th</sup> February.

Three core agreements underpin the governance and functioning of the International Group, namely the Group Constitution, the International Group Agreement and the Pooling Agreement. More details on these agreements can be found on the International Group's website at <a href="http://www.igpandi.org">http://www.igpandi.org</a>.

Steamship's strategy is to be the best provider of the full range of marine protection and indemnity (P&I) and related insurances, on the mutual principle, delivering both first class service and security at a reasonable cost. Steamship aims to distinguish itself from its competitors by embodying the following principles:

- Advocacy of the principle of mutuality and the benefits of this for shipowners across the whole range of their insurance needs;
- A belief in the benefit of a diverse membership by geographical area and vessel type;
- A prudent approach to investment policy resulting in financial security and stability;
- Provision of technical expertise and a dedication to problem solving for the members;
- Pre-eminence in loss prevention initiatives.

Guided by a clearly defined risk appetite statement, risk management is key to Steamship's strategy: diversification of members and vessels to reduce concentration of risk; a prudent investment approach focused on stable, secure returns, constraining market risk; a focus on loss prevention initiatives aiming to limit losses to members and reduce claims; and an internal culture that is sensitive to the requirements of risk management.

Steamship's strategy is to carefully grow its business organically, admitting new Members with high quality operations and a willingness to pay the premium required by the risk exposure which their business brings to Steamship.

Steamship's business model is therefore to maintain a sharp focus on serving its members and to have a diversified portfolio by trade and geographical location.

The Boards have appointed Managers who are responsible for the day to day handling of underwriting, claims and the administration of the Club's business in accordance with the policies laid down by the Directors. The Managers have operations in several locations to support these activites.

#### Steamship Mutual Underwriting Association Limited ("SMUA")

SMUA was incorporated in England and Wales in October 1909. SMUA is limited by guarantee and does not have share capital as it is owned by its Members (policyholders). The Members of SMUA comprise its Directors, SMUAB, shipowners and other entities who have ships insured by SMUA.

The day to day operations of SMUA are managed by Steamship P&I Management LLP ("SPIM"). SMUA is governed by a Board comprising a non-executive Chairman, six non-executive directors and two members of SPIM. The Board mainly consists of representatives of the Members.

SMUA is regulated by the PRA and the FCA. Both the PRA and the FCA operate a risk-based approach to supervision, which places emphasis on the need for regulated firms to have in place robust risk management frameworks.

SMUA has branches in Hong Kong, Singapore and Japan which are subject to local regulation.

#### Steamship Mutual Underwriting Association (Europe) Limited ("SMUAE")

SMUAE was registered in Cyprus on 4 September 2019 as a Company limited by guarantee pursuant the requirements of Cyprus Companies Law, Cap. 113 and does not have share capital as it is owned by its Members (policyholders). The registered office of SMUAE is at Vashiotis Ikos Centre, 28th October Avenue, Limassol 3107, Cyprus.

SMUAE obtained an insurance licence from the ICCS on 25 October 2019 and its principal activity is the insurance and reinsurance of Protection and Indemnity risks (P&I), and of Freight, Demurrage and Defence (FD&D) risks on behalf of its Members.

The day to day operations of SMUAE are managed by SPIM. SMUAE is governed by a Board comprising a non-executive Chairman, three non-executive directors, one member of SPIM and one member of Steamship Insurance Agency (Europe) Ltd "SIAE". The Board mainly consists of representatives of the Members.

#### The Steamship Mutual Underwriting Association (Bermuda) Limited ("SMUAB")

SMUAB was established by an Act of the Parliament in Bermuda on 24 June 1974 and began underwriting with effect from 20 February 1975. SMUAB is also limited by guarantee and does not have share capital as it is owned by its Members (policyholders). The members of SMUAB comprise its Directors and all members of SMUA and SMUAE.

The operations of SMUAB are managed by Steamship Mutual Management (Bermuda) Limited and therefore SMUAB does not have any employees. SMUAB is governed by a Board comprising a non-executive Chairman, twenty seven non-executive directors, and, two Directors of the Manager's London representatives. The Board mainly consists of representatives of the Members.

SMUAB ceased writing direct business from February 2015 but continues to operate as a reinsurer of SMUA and SMUAE.

SMUAB is regulated by the BMA and is classified as a 'Class 3A insurer' (Solvency II equivalent).

Hydra Insurance Company Ltd is a private company owned by the twelve members of the International Group of P&I Clubs, of which SMUAB is one.

Hydra provides reinsurance to its shareholders on a Club by Club basis through segregated accounts where premiums, losses and expenses are allocated amongst the shareholder Clubs' segregated accounts ('cell'). The Steamship Hydra cell is consolidated into the results of SMUAB.

#### Steamship Mutual Trust (the "Trust")

The Trust and its Corporate Trustee, The Steamship Mutual Underwriting Association Trustees (Bermuda) Limited ("SMUAT") were established on 11 March 1983 in Bermuda.

SMUAT is a registered insurer under Bermudian law, and this enables the Trust to act as an independent insurer for the benefit of the beneficiaries set out in the Trust Deed. These are, in addition to a number of named charities, all the Members for the time being of SMUAB.

SMUAT is governed by a Board comprising a non-executive Chairman, three non-executive directors, and the Chairmen of SMUA, and SMUAB.

The operations of the Trust are managed by Hamilton Investment Management Limited and therefore the Trust and SMUAT do not have any employees. Through SMUAT the Trust is regulated by the BMA and is classified as a 'Class 3A insurer' (Solvency II equivalent).

Each year commencing 20 February the Trust enters into a reinsurance contract with SMUAB for the reinsurance of all risks accepted.

Following the implementation of Solvency II rules from 1 January 2016, the BMA became the supervisor of the regulatory group with SMUAT being named as the 'Designated Insurer' (and hence lead insurer) for Group supervision purposes.

SMUAE was established to ensure that previous EEA members of SMUA would be able to continue to be insured by the Steamship, representing approximately 30% of SMUA's business. From 20 February 2020, following Brexit, Members whose place of management is within the EEA and certain other jurisdictions, can have their entries accepted by SMUAE which is incorporated in Cyprus. The Rules, the scope and types of cover, the levels of service, and the financial security of SMUAE are the same as those of SMUA.

#### **A.2 Performance**

SMUAE's gross written premium for the year ended 20 February 2023 was \$138.2 m (2022 was \$98.1 m). The result for the year was a surplus of \$2.5 m (2022: deficit of \$3 m). The net combined ratio for the year was 95% (2022 was 110.2%). The key drivers of the surplus were the lower than anticipated Pool claims from the International Group for the 2022/23 policy year.

For the year ended 20 February 2023, the Directors set a 12.5% general increase in premium. At the 2023/24 renewal the general increase was set at 7.5%.

#### The year ahead

The Ukrainian crisis, has had minimal impact on the Club's underwriting, claims, investments and operations, and all sanctions are being adhered to as required.

The very positive renewal with an achieved premium increase of 6.4% (including the value of changes to terms and conditions) against a general increase of 7.5% on expiring premium renewing provides confidence in achieving underwriting balance in policy year 2023/24.

#### **A.3 Investment Performance**

One of Steamship's primary objectives is to have a prudent investment policy in order to maintain financial security and stability.

SMUAE's policy is to invest predominantly in stable assets. As of 20 February 2023, the investment portfolio consists of money market funds of \$37.2 m, short duration bond funds of \$19.7 m and cash at bank of \$6.3 m, achieving an overall investment income of \$0.5 m for the year.

The information presented in section A provides a true and fair view of the business and performance of Steamship during the year.

#### B.1 General information on the system of governance

Steamship has an effective system of governance in place which provides for sound and prudent management.

Steamship entities are governed by Boards comprising a non-executive Chairman and non-executive Directors representing the Members.

The following table sets out the Board composition of each Steamship entity.

B A McAllister, McAllister Towing (appointed 21 December 2022)

A L Tung, Island Navigation Corp International Ltd R Zagari, Augustea Group

The Boards of Directors has the ultimate responsibility for the business operating in accordance with applicable laws and regulations. The Boards decides on Steamship's strategic business plan and establishes directives and instructions, as well as ensuring that appropriate internal instructions for risk management and risk control exist. The Boards continuously monitors the operations of Steamship, its financial performance and stability.

The Audit and Risk Committee of the Boards has responsibility for the detailed review of published financial reports, liaison with internal and external auditors and regulators. The Finance and Nomination Committee of the Boards has responsibility for reviewing the fees paid to the Managers and Directors.

#### **B.2 Fit and proper requirements**

Steamship is committed to ensuring that all members of its Boards, the key control function holders, and other senior individuals within Steamship, behave with integrity, honesty and skill, and this commitment is documented in the Key Person policy. Steamship has processes in place to ensure that appropriate standards of fitness and propriety are met and maintained.

Steamship's fit and proper requirements are:

- Formal qualifications, knowledge and experience within the insurance sector, other financial sectors or other relevant sectors or businesses:
- For control functions within Steamship that require knowledge of accounting, actuarial, corporate management, business strategy, business models, system of governance and regulatory framework have the appropriate skills: and
- Honesty and financial soundness based on evidence regarding character, personal behaviour and business conduct including any criminal, financial and supervisory record.

The Managers maintain a governance map (see Appendix 1) which sets out how governance functions are fulfilled and devolved. This addresses the desires of the BMA, ICCS and EIOPA to ensure proper compliance with the requirement to devolve governance functions under Solvency II and the PRA and FCA's more detailed requirements under the Senior Insurance Managers Regime ("SIMR").

Where a key control function is outsourced, Steamship ensures that the outsourcing firm carries out appropriate assessments of fitness and propriety for those responsible for the provision of the function and provides evidence of this.

In addition, the Boards' 'Finance and Nomination Committee' regularly reviews the structure, size and composition of the Boards, including skills, knowledge and experience, and makes recommendations to the Boards with regard to any changes. When a new appointment is required, the Finance and Nomination Committee evaluates the balance of knowledge, skills and experience of the Board members and uses this evaluation to inform the selection of a suitable candidate.

Records are maintained, and notifications made to the regulators, as and when required.

#### B.3 Risk management system (including the GSSA)

The objective of Steamship's risk management system is to ensure that the business is carried out within the overall risk appetite set by the Board. The system is characterised by a holistic, integrated and top-down enterprise risk management system, based on a shared risk culture.

Any consideration of culture at Steamship must begin with the understanding that it is an organisation owned by its members and run for its members. This distinguishes P&I Clubs from non-mutual insurers and is a major factor in Steamship's strategic thinking and decision-making, in turn reflected in its handling of matters ranging from premium setting and return of capital to the consideration of claims outside the standard rules of cover.

The risk management system is executed through the risk management control cycle, which involves the systematic identification, valuation, monitoring and reporting of existing and emerging risks. The Risk Management function is responsible for monitoring Steamship's risk management system reporting to the Executive Chairman.

Steamship uses the three lines of defence assurance model which segregates business operations from oversight and monitoring activity to improve independence and assurance over business processes.

# First line of defence Business Operations Underwriting, Claims, Human Resources, Finance, Statistics (Pricing) Second line of defence Third line of defence Internal Audit

The first line of defence is carried out by the operational functions. The second and third lines of defence are independent of the operational functions. Risk Management and compliance, together with the Actuarial & Statistics function jointly constitute the second line of defence.

The third line of defence is Internal Audit. This function is fully independent and appointed by the Board.

Risk owners self-assess risk ratings and the quality of underlying controls before Risk Management undertake independent design and operational effectiveness testing.

Risk profiles are considered on an inherent and residual (after controls) basis and are documented within Steamship's risk register, with aligned controls and risk categories for capital purposes. Steamship's risk profile draws on risk tolerance and trigger metrics; risk events; recommendations from internal and external sources; emerging risks & market developments; and current controls and mitigation techniques. There is a high level of expertise and experience on the Board. During Board meetings which generally take place over extended periods of three to four days three times a year, Directors are able to bring their considerable industry knowledge and experience to bear on a range of both strategic and operational issues. Steamship's Managers are insurance professionals who engage on a day-to-day basis with market and regulatory developments that may affect either the Club's insurance activity or the wider maritime community whose liability risks it underwrites. Together, Directors and Managers are either members of or attendees at meetings of the Board's key decision-making bodies whose deliberations inform the current and forward-looking risk profile of the Club.

The strategic business plan, risk strategy, risk appetite statement and tolerance & triggers report are integral components of Steamship's Risk Management System and are reviewed at least once a year. In this way Steamship ensures that the risk management system is kept up to date.

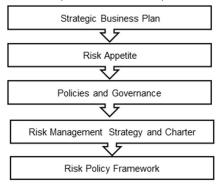

#### Group Solvency Self-Assessment ("GSSA")

Steamship monitors and manages the risks relating to its operations through its fully documented risk management programme which analyses exposures by degree and magnitude of risks. This is evidenced in the GSSA report.

The GSSA has been carried out in accordance with the ORSA Policy. The Policy states that the GSSA is performed at least annually when the Board considers the future capital requirements, capital levels and the general increase.

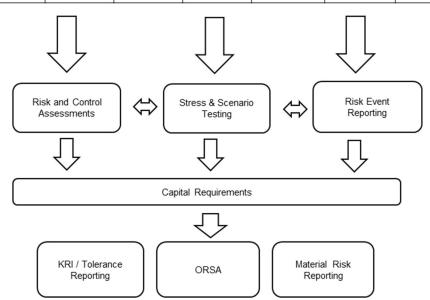

The GSSA will be undertaken more frequently if specific conditions, which are set out in the Policy, are met. The Board has overall responsibility for the GSSA.

The ORSA policy defines the steps that make up the overall ORSA process, which are summarised in the Chart below.

			Risk Types			
Underwriting Policy	Reinsurance Policy	Credit Risk Policy	Reserving and Claims Management Policy	Investment Policy	Liquidity Policy	Operational Risk policy

			Other Policies			
Actuarial Policy	Data Policy	Validation Policy	Remuneration Policy (SIMSL)	Business Continuity and Disaster Recovery Policy	Internal Control Policy	Anti – Bribery & Anti – Fraud Policy
Compliance Charter	Data Protection Policy	Stress Testing Policy	Code of Business Standards and Ethics	Outsourcing and Third Party Supplier Policy	Capital Management Policy	Board Diversity Policy
Internal Audit Policy & Internal Audit Charter	GSSA - ORSA Policy	Expenses & Expenses Currency Hedging Policies	Conflicts of Interest Policy	Key Person Policy	Reporting and Disclosure Policy	Anti – Slavery Policy
Internal Control Policy	Asset Liability Management Policy	Sanctions Policy	Whistleblowing Policy	Anti – Money Laundering Policy	Expenses Policy	Internal Control Policy

The Risk management and ORSA policies include a description of each process and an explanation as to how each has been completed in order to fulfil the objectives of the ORSA as a whole. The most recent GSSA was carried out in October 2022 and documents Steamship's risk and capital management processes employed to identify, assess, manage and report the risks it may face and to determine the capital resources required to ensure that its overall solvency needs are met at all times. The GSSA is an integral part of Steamship's business strategy, explaining how the strategy aligns to risk appetite and the current risk profile. A solo ORSA was carried out for the Association in December 2022.

The GSSA includes both the economic capital position of the Group and the entity regulatory capital positions by reference to the SCR and the Minimum Margin of Solvency (MMS) for the next three years.

To assist in this process Steamship has developed its own fully integrated financial capital model for the purpose of quantifying its own risks. The internal capital model uses stochastic simulations to generate financial projections which are calibrated to Steamship's own historical outcomes and relevant International Group and external data. Steamship uses an Economic Scenario Generator ("ESG") for the calculation of market risk. The ESG is a simulation model that produces arbitrage-free economic scenarios. These scenarios include a variety of key variables, such as interest rates, credit spreads, equity and property returns and, foreign exchange rates.

#### **B.4 Internal control system**

The internal control system is designed to provide reasonable assurance regarding the proper implementation of Steamship's business strategy and the achievement of operational and financial strategic objectives through:

- monitoring and control of all risks, particularly key risks and the relevant internal controls; and
- robust, proportionate compliance.

The internal controls are documented in Steamship's Internal Control Policy, which sets out the detailed processes for all aspects of the management of Steamship on a day-to-day basis.

#### Compliance function

The compliance function consists of a Group Head of Compliance (based in Bermuda), Chief Risk Officer assisted by a Compliance Associate (based in London), and a local Senior Risk and Compliance Officer dedicated to SMUAE. The Compliance function is responsible for providing general oversight of control effectiveness through the administration of a programme of thematic internal controls reviews, the provision of remedial advice and the monitoring of relevant legislative and regulatory changes.

#### **Risk Management function**

The risk management function is responsible for:

- identifying, managing, monitoring and reporting on current and emerging risks;
- setting the overall risk management and strategic framework; and
- monitoring and assisting in the effective operation of Steamship's risk management framework and maintaining an accurate view of Steamship's risk profile.

Steamship's Chief Risk Officer ("CRO") is assisted by a risk management associate and the local Senior Risk and Compliance Officer dedicated to SMUAE. The CRO manages day to day risk monitoring together with the Chief Finance Officer and the Director of Capital Management, all of whom report to the Board.

#### B.5 Internal audit function

Steamship's Internal Audit function is outsourced to PricewaterhouseCoopers LLP. The function independently develops an internal audit plan based on its perception of risks to Steamship after consultation with Directors, Managers and the Risk Register. The scope of the plan is reviewed and approved by the Audit and Risk Committee. The segregation of Internal Audit's activities ensures independence and objectivity in the work that it undertakes.

#### **B.6 Actuarial function**

The actuarial function consists of a team of four including the Statistics Director who fulfills the function for SMUA as Chief Actuary. The Designated Actuary for the Group, SMUAT, SMUAB and SMUAE is fulfilled by M Munoz Vilar FIA.

The Actuarial Function resides in the Statistics Department of Steamship Insurance Management Services Limited and is responsible for the calculation of technical provisions (for both financial reporting and solvency calculations), maintaining Steamship's Business Plan, the maintenance of Steamship's internal capital model and aids the effective running of the risk management system, production of the GSSA, and the opinions on underwriting policy and the adequacy of reinsurance arrangements.

#### **B.7 Outsourcing**

Steamship has an outsourcing policy in place which is approved by the Board. The outsourcing policy ensures that outsourcing of critical or important functions or activities does not lead to any of the following:

- an undue increase in operational risk;
- an impairment in the quality of Steamship's systems of governance;
- difficulties for supervisory authorities in monitoring compliance; and
- a deterioration in service to Members (policyholders)

Management assesses whether a function or activity is critical or important and reports to the Board whenever outsourcing of a critical or important function or activity is considered and also when an agreement has been entered into.

The below functions are deemed Critical and Important for Solvency II purposes:

- Management services provided by Steamship P&I Management LLP ("SPIM"), FCA FRN 597046 (SPIM is
  the management company of the Steamship regulatory group entities covered by this document, which are
  SPIM's sole clients, so that SPIM's risks and controls are largely synonymous with those of Steamship);
- 2. Information Technology services provided by Complete IT Ltd;
- Internal Audit services provided by PricewaterhouseCoopers LLP;
- 4. Underwriting activities on the Club's behalf by Post & Co, a Rotterdam-based broker, concerning the European Inland and Short Sea insurance Facility, and;
- 5. Microsoft Ireland Operations Limited in relation to the provision of Office 365 software which hosts much of Steamship's business data on external cloud servers.

#### **B.8 Other information**

There have been no material changes in the system of governance during the year, and Steamship believes it remains appropriate considering the nature, scale and complexity of the risk inherent in the business. In particular, the centralised approach reflects the highly integrated and inter-dependent nature of Steamship's activities.

Steamship monitors and manages the risks relating to its operations through its risk management programme which analyses exposures by degree and magnitude of risk. This is evidenced in the GSSA report.

The GSSA documents the risk and capital management processes employed by Steamship to identify, assess, manage and report the risks it may face and to determine the capital resources required to ensure that its overall solvency needs are met at all times. The GSSA considers the business strategy, how the strategy aligns to risk appetite and the current risk profile.

The principal risks faced by Steamship are insurance risk, market risk, credit risk, liquidity risk and operational risk.

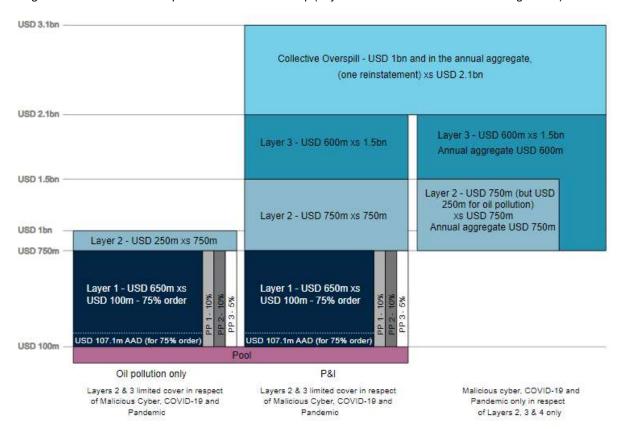

### C Risk Profile

#### C.1 Insurance risk

Insurance risk is comprised of two elements; premium risk and reserving risk. Premium risk refers to the risk that insurance premium written in the current policy year is insufficient to cover claims and other costs arising in that year. It thus relates to the future, whereas reserving risk is the risk that, over the next year, existing technical provisions are insufficient to cover claims arising in previous policy years. Steamship is exposed to the uncertainty surrounding the timing, frequency and severity of claims made under its insurance contracts.

Premium is set using assumptions which have regard to trends and the past experience of a specific Member. Premium risk is mitigated by diversification across a variety of ship types and geographical areas, and by careful selection and implementation of underwriting strategy guidelines including the screening of new Members.

Steamship transfers a substantial portion of its risk to its reinsurers through the provisions of the reinsurance arrangements and its membership of the International Group (Layers of the 2023/24 Reinsurance Programme).

The key methods used to estimate claims liabilities are Bornhuetter-Ferguson for the most recent policy year reported and the Development Factor Method for all other policy years. Reserves for both reported and unreported claims are calculated using detailed statistical analysis of past experience as to frequency and average cost of claims. The Audit and Risk Committee compares the proposed claim reserves with an independent calculation performed by qualified actuaries at year end. For financial reporting purposes, Steamship aims to reduce reserving risk by setting claims reserves at a prudent level that provides between 70% and 80% confidence that they will be sufficient to cover actual settlement costs. Actual experience will differ from the expected estimates, but this prudent reserving basis is expected to result in releases of prior year claim reserves.

## C Risk Profile

#### C.2 Market risk

Market risk is the risk of financial loss as a consequence of movements in the prices of equities and bonds, interest rates, currency exchange rates and other price changes. Market risk arises primarily from investment activities.

Steamship's exposure to changes in interest rates and market prices is concentrated in the investment portfolio. The risk appetite, asset allocation and tolerance ranges are set by the SMUAT Board having consulted with the Boards of SMUAB, SMUAE and SMUA. Exposures and compliance with Board policies are monitored and reported by the Managers assisted by independent investment consultants.

The Association receives the majority of its premium income in US dollars and a significant amount in Euro. Claims liabilities arise in a number of currencies but predominantly in US dollars and Euro. This exposure is mitigated by holding cash in these currencies. To minimise currency translation costs operational bank balances in local currencies are maintained to fund expected short-term claim payments in those currencies.

#### C.3 Credit risk

Credit risk is the risk that a counterparty owing money to Steamship may default causing a debt to be written off. The extensive reinsurance protection arranged by Steamship effectively transforms a proportion of insurance risk into credit risk as the exposure becomes the risk of reinsurer default. External reinsurers are generally only used if their financial strength rating is at Standard & Poor's A- or an equivalent rating from another rating agency except in the case of some Members of the International Group and participants on reinsurance contracts placed through the International Group.

The credit risk arising from the reinsurance contracts with SMUAB and SMUAT is mitigated through the operation of a collateral agreement.

Credit risk in respect of amounts due from Members is spread across diverse industries and geographical areas. Cover can be cancelled and claims set off against unpaid premium and there are other strong incentives for Members to keep their insurance cover in place. In practice therefore the prompt payment of premium means bad debt is immaterial.

Credit risk arises on operational balances and deposits held with banks. The Association limits individual exposures to US\$15m for banks rated AA by S&P Global, or an equivalent rating from another agency, US\$10m for banks rated A by S&P Global, or an equivalent rating from another agency, US\$5m for banks rated BBB or worse by S&P Global, or an equivalent rating from another agency and US\$10m for not rated banks if the bank is a member of a Deposit Protection Fund that will guarantee protection of at least US\$10m or has a Tier 1 capital ratio above 11.5%.

SMUAE's principal counterparty exposure derived from amounts recoverable from its reinsurers. At the 20 February 2023 the provision for reinsurance recoveries on an IFRS basis is \$203,5 m, of which \$32.8 m was from external reinsurers, and \$162.5 m was from SMUAB and \$8.2 from SMUAT.

#### C.4 Liquidity risk

Liquidity risk is the risk that Steamship cannot meet its financial obligations as they fall due. Steamship maintains a highly liquid portfolio of cash, government and corporate bonds with a maturity equivalent to the expected settlement period of claim liabilities. Most of the remaining assets in the surplus portfolio could be converted into cash in less than one month.

#### C.5 Operational risk

Operational risk includes fraud, interruptions in service due to external or internal disruption and procedural or systems errors. Steamship has identified its operational risks in a risk register and has in place appropriate controls to manage and mitigate such risks, consistent with good practice, regulatory guidance and legislation relating to human resources, financial crime, business continuity and information security. Appropriate controls are also in place to monitor the outsourcing of operations to the Managers and, through them, other service providers.

#### C.6 Other material risks

SMUAE relies on the strength of the overall Steamship balance sheet to support its credit rating which represents a key marketing tool, and reinsures 90% of its retained risk with SMUAB.

The risk for SMUAE is limited as there are consistent policies and procedure across the Group. A loss is more likely to manifest in all entities at once and hence arise from one of the other risks.

## C. Risk Profile

#### **Group Risk**

Group risk is the risk of loss resulting from risk events arising within a related entity. Under Solvency II Steamship is considered to be a regulatory group and has to monitor the individual Steamship companies to ensure that capital resources are more than sufficient to meet the requirements set by local regulators.

#### C.7 Other information - Stress and sensitivity tests

Steamship has developed a suite of stress and sensitivity tests, including reverse stress tests, which are used to measure the robustness of the capital position.

During 2022/23 the following stress tests were carried out:

Scenario	Issues / Assumptions	Impact	Observations/Actions
Impact of Russia-Ukraine conflict	<ul> <li>Heavy sanctions were introduced affecting Russian State</li> <li>Impact of Russia-Ukraine conflict affects underwriting, claims, investments and operations</li> </ul>	<ul> <li>Underwriting – reduced premium due to sanctions (~\$750k)</li> <li>Russian/Belarusian nexus claims which either are legacy claims plus any new P&amp;I and Hull War (&lt;\$5m)</li> <li>Investments (&lt;\$5m)</li> <li>Operational Risk (&lt;\$5m)</li> </ul>	Club's aggregate exposure is within the Incidental risk impact range (\$0m - \$5m) and most likely at the lower end of that range
Environmental, Social & Governance	This test examines physical and transitional risks relating to Pollution and Wreck Removal and considers the net of RI exposure	Wreck removal is likely to have the most pronounced financial impact on P&I providers, being of respectively high (\$25m-\$50m), or very high (>\$50m)	Whilst Steamship continues to be exposed to the familiar risk of a large number of sub-\$10m claims or an accumulation of pool claims, this test concludes that there are currently no data to suggest that such an eventuality will inevitably arise as the result of climate change
Financial Resilience	This test proposes a range of deteriorating macroeconomic scenarios affecting Steamship's bond portfolio	<ul> <li>Higher capital charges due to increased outstanding claims and increased credit risk on investments</li> <li>Group Combined ratio increases by 3.5% on the Optimistic scenario, 9.2% on the Central scenario and 14.1% on the Pessimistic scenario</li> <li>SMUAE Regulatory Capital ratio reduces by 4% on the Pessimistic scenario, no impact on liquidity given the types of assets held by SMUAE and minimal impact on collateral assets provided by SMUAT relating to reinsurance liabilities</li> </ul>	Steamship's current capital position means that it would be able to withstand the shock of each of these potential scenarios without the need to make additional (unbudgeted) calls
Reinsurance [part Reverse] Stress Test	This stress test is designed to cause the Steamship Group to fail as a result of multiple \$2bn claims, in addition to retained claims at double the levels of	<ul> <li>Group Capital shortfall of \$408m</li> <li>All IG clubs would be affected and would likely cause the collapse of the IG</li> </ul>	This extreme reverse stress test scenario would result in the failure of Steamship which would likely

## C. Risk Profile

the worst performing years and the catastrophic insolvency of all reinsurers triggered by numerous assumed major disasters (natural or manmade). The possibility of such a complete meltdown amongst reinsurers is extremely remote

- Total depletion of Steamship's reserve funds - to a point at which the regulatory authorities would require their replenishment in order to carry on trading
- The reputational risk would be no greater for any other Club, although the majority would probably cease trading
- High limits of coverage would no longer be available causing the majority of Members to seek cover elsewhere

trigger the rapid reestablishment of new insurance companies (and a new mutual) to provide liability cover

The Steamship Group also carried out the following stress tests during 2022/23 in accordance with the BMA Group requirements:

- 40% decline in equity prices
- 40% decline in alternative investments and real estate
- Extreme US Yield Curve Widening
- Widening of credit spreads
- Foreign currency shocks
- Inflation and Monetary Policy risk
- Rating Downgrade
- Underwriting loss scenarios Realistic disaster scenarios, New latent liability worst-case aggregated loss
- Terrorism
- Technology risk

The following sensitivity tests were also carried out in 2022/23 principally to help identify and test the suitable level of buffer above the 'AAA' Standard & Poor's requirement.

- Single claim of \$2 billion in current policy year
- 5% increase in claims incurred on current policy year

The stress and sensitivity testing results show that Steamship is most vulnerable to high claims experience. However, Steamship benefits from significant reinsurance cover for incidents greater than \$10 m and is expected to continue to meet its Solvency requirements in all scenarios.

# D. Valuation for Solvency Purposes

#### **D.1 Assets**

In accordance with the Solvency II Directive, SMUAE's assets and liabilities (other than technical provisions) are measured in accordance with principles of an arm's-length transaction between knowledgeable willing parties using market consistent valuation methods.

The following tables display the IFRS Balance Sheet as reported within the audited financial statements, the Solvency II adjustments made and the Solvency II Balance Sheet for SMUAE.

	2023	Adjustments	2023
Assets	IFRS \$000		Solvency II \$000
Investments	56,902	-	56,902
Deferred Acquisition Costs	328	(328)	-
Reinsurers' share of technical provisions	203,451	(55,561)	147,890
Receivables	5,664	-	5,664
Cash and cash equivalents	6,295	_	6,295
Total assets	272,640	(55,889)	216,751
Liabilities			
Technical provisions	222,835	(55,018)	167,817
Insurance & intermediaries payables	5,936	-	5,936
Reinsurance payables	3,592	_	3,592
Total liabilities	232,363	(55,018)	177,345
Free reserves	40,277	(871)	39,406

The investments are valued for Solvency II purposes on the same basis as the annual financial statements, which follow IFRS.

The reinsurance recoverables have, for Solvency II purposes, been discounted using the risk-free rate term structure.

#### **D.2 Technical Provisions**

The key change under Solvency II is the economic valuation of technical provisions, comprising:

- the best estimate of all cashflows, positive and negative, discounted to reflect the time value of money;
- provisions at market value (hence, a risk margin must be added reflecting the cost of the capital tied up in running the liabilities);
- inclusion of legally bound contracts (even if not yet incepted); and
- all future outcomes (including events not in [historical] data or ENIDs have to be considered).

## D. Valuation for Solvency Purposes

#### **Reconciliation of Technical Provisions**

Below is a reconciliation of insurance liabilities reported in the audited financial statements and the technical provisions on Solvency II basis for SMUAE.

Published Technical Provisions, \$000	Gross R	einsurers' share	Net
IFRS insurance liabilities	222,835	203,451	19,384
Adjustments			
Remove unearned premium	(1,329)	-	(1,329)
Remove prudent margin	(16,211)	(14,996)	(1,215)
Add bound but not incepted	(17,859)	(17,134)	(725)
Add events not in data	3,600	3,240	360
Add provision for reinsurer default	-	(472)	472
Discount cash flows	(28,806)	(26,199)	(2,607)
Add risk margin	5,587	-	5,587
Total adjustments	(55,018)	(55,561)	543
Regulatory technical provisions	167,817	147,890	19,927

Steamship values technical provisions using the methodology prescribed by the Solvency II Directive. This methodology is documented in Steamship's paper Solvency II - Basis of Preparation.

For IFRS the insurance liabilities are valued using undiscounted values.

For Solvency II purposes the technical provisions are the sum of the best estimate and the risk margin. The technical provisions are calculated separately for the premium provision and for the claims provision, both using a best estimate basis.

The best estimate is the probability weighted average of future cashflows discounted with the risk-free term structure for US dollars provided by EIOPA. The probability-weighted average future cashflows are calculated according to actuarial best practice, using several methods and techniques such as the Development Factor Method (DFM) and the Bornhuetter-Ferguson technique for immature policy years.

As a monoline Protection & Indemnity insurer, Steamship currently uses one homogeneous risk group for the calculation of technical provisions.

The risk margin is the cost of holding the SCR to run off, determined by multiplying each year's projected SCR by the current prescribed cost of capital of 6% per annum.

The key source of uncertainty in the technical provisions is the randomness of claims both in terms of size and timing, and the impact on the ultimate cost of the unpaid claims.

#### **D.3 Other information**

There are no other differences between the valuation bases, methods and main assumptions used for solvency purposes and financial statements purposes.

No other material information is applicable.

## E. Capital Management

#### E. Capital Management

Steamship is committed to maintaining a strong capital position in order to be a robust insurer for its Members (policyholders). The objective is to maintain a solvency level in line with the risk appetite statement. Sensitivity tests for the principal risks are performed periodically and annual stress tests are performed to test Steamship's robustness to withstand moderate to severe scenarios. A key objective is to maintain a capital position and a risk profile that supports a Standard & Poor's 'A' rating.

Steamship's risk appetite statement requires that each regulated entity should hold Own Funds at least equal to 120% of the regulatory requirement.

Steamship undertakes a GSSA annually and when the risk profile or business model changes. The GSSA incorporates the business planning process which is typically considered over a three-year time horizon. Solvency ratios are regularly monitored by the Audit and Risk Committee and Boards.

#### E.1 Own funds

The tables below detail the capital position of SMUAE as at 20 February 2023. With respect to the capital position, the Solvency II regulations require insurers to categorise own funds into the following two tiers with differing qualifications as eligible available regulatory capital:

- Tier 1 capital consists of Free Reserves of the entities on a Solvency II economic basis (Basic Own funds 'Unrestricted'); and
- Tier 2 capital consists of ancillary own funds ("AOF").

Ancillary own funds consist of items other than basic own funds which can be used to absorb losses. AOF items require the prior approval of the supervisory authority. Steamship has approved AOF items.

The rules impose limits on the amount of each tier that can be held to cover capital requirements with the aim of ensuring that the items will be available if needed to absorb any losses that might arise.

The following tables show the breakdown of eligible Own Funds to meet the SCR.

As at 20 February 2023	
Own Funds by Tiers	\$000
Tier 1 Basic Own funds (Unrestricted)	39,406
Tier 2 Ancillary own funds	17,246
Total Eligible own funds to meet the SCR	56,652
As at 20 February 2022	
Own Funds by Tiers	\$000
Tier 1 Basic Own funds (Unrestricted)	24,905
Tier 2 Ancillary own funds	15,618
Total Eligible own funds to meet the SCR	40,523

## E. Capital Management

SMUAE's Tier 1 Own Funds are made up 100% of free reserves. As such all capital is Tier 1 and there are no restrictions on the availability of SMUAE's Tier 1 own funds to support the MCR or SCR.

For the year ended 20 February 2023, SMUAE also has approved Tier 2 AOF of \$26m for the ability to make an additional premium call on Mutual Members.

The ICCS recognises that SMUAE can increase own funds by making additional premium (also known as unbudgeted supplementary calls) under its Rules in extreme circumstances. The ICCS has granted approval for a method of calculation of AOF and, subject to an annual confirmation by SMUAE that key factors remain valid, the method is approved until 20 April 2026. Under Solvency II regulations, up to 50% of the SCR may be supported by approved AOF.

The future risk profile of Steamship is anticipated to remain relatively stable.

The following tables show the breakdown of eligible Own Funds to meet the Minimum Capital Requirement ("MCR").

As at 20 February 2023	
Own Funds by Tiers	\$000
Tier 1 Basic Own funds (Unrestricted)	39,406
Tier 2 Ancillary own funds	<u> </u>
Total Eligible own funds to meet the MCR	39,406
As at 20 February 2022	
Own Funds by Tiers	\$000
Tier 1 Basic Own funds (Unrestricted)	24,905
Tier 2 Ancillary own funds	
Total Eligible own funds to meet the MCR	24,905

#### E.2 Solvency Capital Requirement and Minimum Capital Requirement

The SCR and MCR have been determined using the 'Standard Formula' approach as set out in the Solvency II regulations. No material simplified methods or undertaking-specific parameters have been used in this assessment.

The following table show the breakdown of the SCR and MCR.

#### As at 20 February 2023

Risk Category	\$000
Non-life underwriting risk	22,383
Counterparty default risk	10,676
Market risk	1,324
Operational risk	4,867
Total before diversification between risk	39,250
Diversification between risk categories	(4,759)
SCR	34,491
MCR	8,623
Ratio of eligible own funds to SCR	164%

## E. Capital Management

As at 20 February 2022	
Risk Category	\$000
Non-life underwriting risk	18,102
Counterparty default risk	10,958
Market risk	808
Operational risk	5,575
Total before diversification between risk	35,443
Diversification between risk categories	(4,207)
SCR	31,236
MCR	7,809
Ratio of eligible own funds to SCR:	130%

#### E.3 Use of Duration based equity risk sub-module in the calculation of SCR

The duration-based equity risk sub-module has not been used in the calculation of the SCR.

#### E.4 Difference between Standard Formula and any Internal Model used

No internal or partial internal model has been used in the calculation of the SCR.

# E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement

SMUAE has set out to be fully compliant with the Standard Formula calculation of MCR and SCR and is not aware of any non-compliance.

SMUAE have maintained Own Funds (Free Reserves) in excess of the MCR and SCR throughout the period.

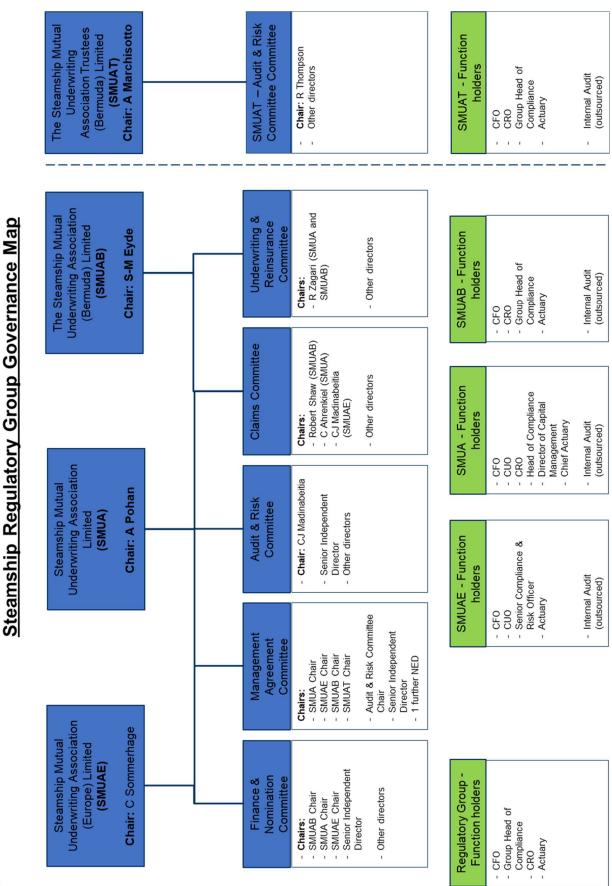

#### **E.6 Other information**

Steamship has an interactive Standard & Poor's rating of A with a negative outlook.

#### Subsequent events

No events after the reporting period affected the understanding of the users of this report.

## Appendix 1 – Steamship Regulatory Group Governance Map

#### List of reported templates

S.02.01.02 - Balance Sheet

S.05.01.02 - Premium, claims and expenses by line of business

S.05.02.01 – Premium, claims and expenses by country

S.17.01.02 – Non-Life Technical Provisions

S.19.01.21 – Non-Life insurance claims

S.23.01.01 - Own Funds

S.25.01.21 – Solvency Capital Requirement – for undertakings on standard formula

S.28.01.01 - Minimum Capital Requirement - Only life or only non-life insurance or reinsurance activity
